

Bug reports list:

- 1- Text size percentage
- 2- Frame label change
- 3- Cube letter logo
- 4- Round shape logo background colour
- 5- Two different shapes - same logo with different size
- 6- Round shape - no frame fits
- 7- Bitcoin, pdf, image appear for moment on page after reload
- 8- VCARD fields without data entry rules
- 9- QR code is broken when VCARD field fill then frame change
- 10- Zip code can be minus value
- 11- Bitcoin amount can be in minus
- 12- ENTER CONTENT button and text field bellow position
- 13- no.17 pattern is not clickable
- 14 - Background colour can not be black
- 15 - Certain frames with custom frame colour checked
- 16 - Tittles are not capitalized correctly in custom marker colour segment
- 17 – Hex code entered manually does not change colour in colour picker
- 18 – Not the same number of pattern for round and square frame
- 19 – Frame label field exist on frames without labels

Bug tickets:

1. Text size percentage

Description: When we want to change the size of the text in the frame section, the percentage always remains 100% even though we changed the size of the text.

Steps to reproduce:

1. Click on Frame section
2. Select frame with label option
3. Write text in frame label field
4. Change the text size using the scroll line
5. Check percentage bellow scroll line

Expected result: The percentage should change as we move the scroll line.

Actual result: Percentage always remains 100% .

2. Frame label change

Description: When we type some frame label text and click outside the frame label text field, label will change on frame, but if we change frame label will be reset to default.

Steps to reproduce:

1. Click on Frame section
2. Select frame with label option
3. Write text in frame label field
4. Click outside the frame label field
5. Check text of label on frame
6. Select any other frame with label option
7. Check text in frame label text field
8. Check text of label on frame

Expected result: Text should be the same as we type on initial frame label, until we change it.

Actual result: Frame label text will be reset to default every time when we change frame.

The screenshot shows the Orderific QR Code Generator website. The navigation bar includes links for Home, Case Studies, Pricing, Resources, QR Generator, and Industries, along with buttons for 'Start Free Trial' and 'Book a demo'. The main heading is 'QR Code Generator' with the tagline 'The best QR Code Generator for Free'. Below this is a horizontal menu with categories: URL, TEXT, EMAIL, PHONE, SMS, LOCATION, FACEBOOK, TWITTER, WIFI, YOUTUBE, INSTAGRAM, VCARD, MECARD, and MORE. The 'VCARD' section is selected. The form is titled 'ENTER CONTENT' and contains several input fields arranged in a grid: Firstname, Lastname, Organization, Position (Work), Phone (Work), Phone (Private), Phone (Mobile), Fax (Work), Fax (Private), Email, Website, Street, Zipcode, City, and State. A red arrow points to the 'Zipcode' field, which contains the value '-14'. To the right of the form is a preview of the generated QR code, which appears broken or distorted. Below the QR code is a 'Download QR' button. An orange circular logo is visible in the bottom right corner of the page.

11. Bitcoin amount can be in minus

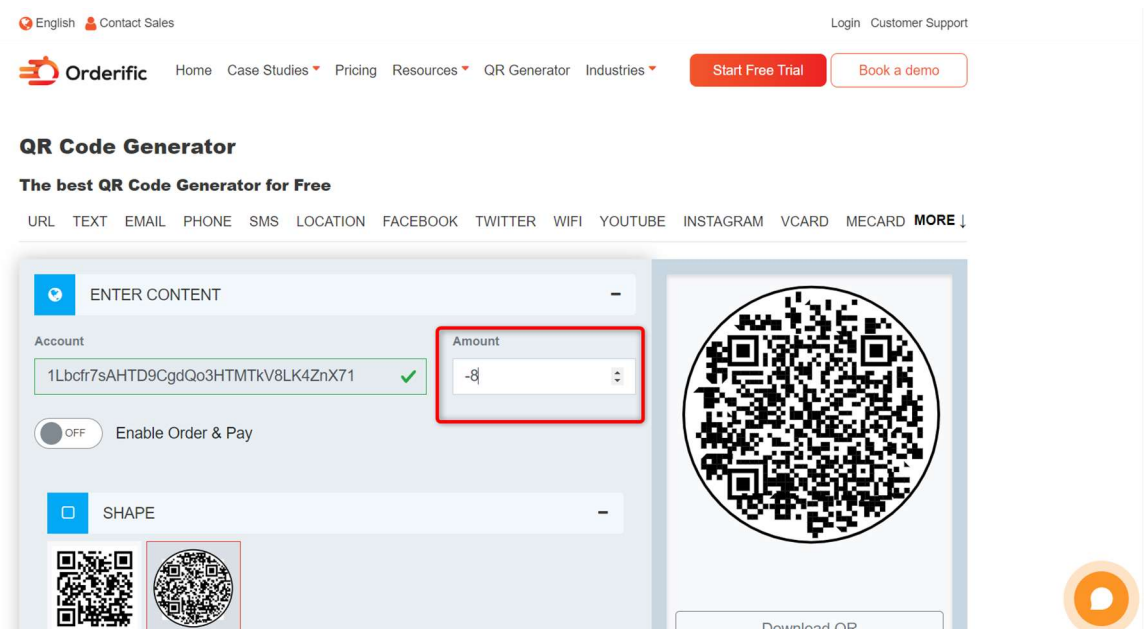

Description: When we select “BITCOIN” inside “MORE” section and click on Amount field we can make amount be minus value by clicking on down button inside field until numbers goes to minus.

Steps to reproduce:
